

MEER ABDULLAH JAWED

DATA ENGINEER | DATA ANALYST

Karachi, Pakistan | +92-315-2070489 | meer.abdullah2016@gmail.com | [LinkedIn Profile](#)

PROFESSIONAL SUMMARY

Data Engineer and Data Analyst with 2+ years of experience building automated ETL/ELT pipelines, integrating multi-source data through REST APIs, performing data migration and quality validation, and developing SQL-driven analytics and business intelligence solutions. Hands-on experience with Python, Pandas, SQL, BigQuery, MySQL, Power BI, Google Sheets, Zoom Phone API, Primo Dialer API, and Google Cloud Service Accounts. Experienced in data ingestion, transformation, cleaning, validation, data modeling, workflow automation, KPI reporting, dashboard development, and performance analysis. Working knowledge of Azure Data Factory (ADF) and Azure Data Lake Storage (ADLS).

TECHNICAL SKILLS

Programming & Data Processing: Python, Pandas, SQL

Data Engineering: ETL, ELT, Data Pipelines, Data Ingestion, Data Integration, Data Transformation, Data Migration, Data Validation, Data Cleaning, Data Quality, Data Modeling

Cloud & Data Platforms: Google BigQuery, Google Cloud Platform (GCP), Azure Data Factory (ADF), Azure Data Lake Storage (ADLS)

Databases: MySQL, BigQuery

APIs & Integration: REST APIs, Zoom Phone API, Primo Dialer API, Google Sheets API, Google Service Account, JSON Credentials, gspread

Business Intelligence: Power BI, Looker Studio, Databox, KPI Reporting, Dashboard Development, Data Visualization

Analytics: Funnel Analysis, Cohort Analysis, Gap Analysis, Statistical Analysis, Performance Analysis

Tools: Apache Airflow, Docker, Jupyter Notebook, VS Code, Claude

PROFESSIONAL EXPERIENCE

Assistant Manager – TGT-Nexus | Karachi, Sindh, Pakistan (May 2026 – Present)

- Designed and implemented end-to-end **ETL/ELT pipelines** using Python, Pandas, SQL, and BigQuery to ingest, transform, validate, and centralize multi-source BPO campaign data.
- Integrated **Zoom Phone API and Primo Dialer API** to automate call-log ingestion and support hourly agent, team, tier, and campaign performance analytics.
- Developed SQL-based **data models, database views, transformations, and analytical queries** for hourly, daily, monthly, agent-wise, team-wise, and tier-wise reporting.
- Automated data extraction, transformation, validation, reporting, and distribution across **APIs, Google Sheets, BigQuery, MySQL, and Power BI**, improving operational efficiency by 30%.
- Implemented **data quality processes** including duplicate detection and removal, null/missing-value handling, data validation, inconsistent-data checks, and automated data cleaning.
- Performed **data migration** between source systems and centralized data platforms, including historical data movement, transformation, validation, and reconciliation.
- Configured **Google Cloud Service Accounts**, JSON service-account credentials, API permissions, and Google Sheets integrations to securely automate data access and reporting workflows.
- Built automated Google Sheets workflows using **Google Sheets API and gspread**, enabling scheduled worksheet updates and reducing manual reporting activities.
- Systematized data processing and validation workflows, reducing pipeline downtime by 45% and eliminating manual data preparation.
- Developed Power BI reporting solutions for **agent performance, call activity, sales, conversion metrics, and operational KPIs**.

Data Associate – Simplified Dashboard | Karachi, Sindh, Pakistan (Nov 2024 – Apr 2026)

- Built and maintained KPI dashboards tracking **CAC, ROAS, conversion rates, and revenue**, improving decision-making speed by 35%.
- Performed **funnel analysis** to identify conversion drop-offs, contributing to an 18% increase in overall conversion rates.
- Conducted **cohort analysis** to improve customer retention insights, contributing to a 12% increase in repeat customer rate.
- Executed **gap analysis** between planned and actual KPIs, helping reduce performance variance by 20%.
- Integrated multi-source **Facebook and Google data** through ETL pipelines, reducing manual data preparation effort by 50%.

- Optimized SQL queries and reporting logic, improving dashboard load time by 40%.

Data Analyst Intern – Codic Solutions | Remote | Brooklyn, New York 11201, USA (Jul 2024 – Sep 2024)

- Performed **exploratory data analysis (EDA)** and statistical analysis on real-world datasets to identify business trends and actionable insights.
- Developed feature engineering logic for an **AI-based HR product**, improving candidate ranking accuracy by 25%.
- Conducted competitor analysis, contributing to a 15% improvement in workflow efficiency.
- Prepared, cleaned, and validated **computer vision datasets** for a shoplifting detection system.
- Collaborated with cross-functional teams to translate data insights into product and workflow improvements.

PROJECTS

Climate Data Pipeline |

- Built an automated **ETL pipeline** using REST APIs, Apache Airflow, and Docker for continuous data ingestion and transformation.
- Reduced data processing latency by 30% through workflow orchestration and automated pipeline execution.
- Designed a scalable pipeline architecture for repeatable data ingestion, transformation, validation, and processing.

HR Recruit Ease |

- Developed an **AI-powered candidate screening system** to analyze candidate video interviews and support automated recruitment workflows.
- Improved candidate screening efficiency by 40%, reducing manual HR effort.

EDUCATION

Bachelor of Computer Science – IQRA UNIVERSITY | Karachi, Sindh, Pakistan | Fall 2025

CERTIFICATIONS

- **Programming in Python** – Meta
- **Introduction to Data Analytics** – IBM
- **Foundations: Data, Data, Everywhere** – Google
